Today was a SS day. This was an odd looking SS day and that maybe attributed that most of the other world markets were closed.

Monday will be a Buy day. We should expect a Decline on a Buy day. Having closed on the highs of the day we may get a penetration first before the decline begins.

Should we gap up above today's highs, then we will have very high odds of atleast getting back to these highs.

Monday May 4<sup>th</sup>, 2009

Today was a Buy day. Seems that the last 3 Buy days have been the same, very shallow declines and even some failure. This is an indication that the markets have turned bullish, or at least that is what the manipulators want us to believe.

Tomorrow is a Sell day. Most of the rally has been accomplished. So tomorrow could be a confusing day.

Today was a Sell day. No additional rally was accomplished and just a small pullback.

Tomorrow is SS day. We still have room to go up if the markets want to get the average 3 day rally.

Wednesday May 6<sup>th</sup>, 2009

Today was a SS day. We did have a good chance of going higher to complete the 3 day rally. However due to the fact that the last 3 Buy day declines have been very small, it does put bullishness in the markets and that took us to the penetration levels on ES.

Tomorrow is a Buy day. How strong will this decline be, is the question?

Thursday May 7<sup>th</sup>, 2009

Today was a Buy Day. We were to expect a Decline and we finally got one. Shorting at the open was the trade of the day as we knew we had 93% chance of at least getting back under 918 on ES.

Tomorrow is a Sell day. We should get a rally from today's lows

Monday May 11<sup>th</sup>, 2009

Today was a SS day and a pretty boring one as we stayed in a small trading range.

Tomorrow is a Buy Day. We have only a small decline so far, the question are the bulls still in control and will they be able to keep the decline from reaching the average.

Tuesday May 12<sup>th</sup>, 2009

Today was a Buy day and we needed a decline. Markets did as expected and made their lows at TTT levels.

Tomorrow is Sell day. Less than half of the rally has been accomplished and we close in the in the middle. That may make for a confusing day.

Wednesday May 13<sup>th</sup>, 2009

Today was a Sell day. We didn't get much of a rally. ES and YM gapped down below the Buy day low and did rally to these lows, while TF and NQ opened above the Buy day low and dropped never looking back. TVGR was in effect all day.

Tomorrow is SS day. We do have 85% chance of getting at least back to the Buy day lows.

Friday May 15<sup>th</sup>, 2009

Today was a Buy day. As expected we did get our decline.

Monday will be a Sell day. We should get a rally from today's lows. We finished 5 waves down today so a correction up would match TTT rally.

Monday May 18<sup>th</sup> , 2009

Today was a Sell day, and as anticipated we did get our Rally and it even reached the TTT levels.

Tomorrow is SS day. Having closed on the highs today, we could get a penetration to reach the 3 day rally levels, before the Decline starts.

Today was a Buy Day. We did get the expected decline.

Tomorrow is Sell day. Having closed near the lows today, I would expect a Buy day Violation before we start the rally. Should we gap below today's lows at the open, then we will have very good odds of atleast getting back above these lows.

Well today was a Sell day. Only NQ managed to get back above the Buy day low after this gap opening.

Tomorrow will be a SS day. We closed below the Buy day low. We do know that we have an 85% chance of getting a positive 3 day rally, however the bears are back and a long weekend is here. Will we get a failed 3 day rally or will this last hour rally be enough momentum to get us there.

Friday May 22<sup>nd</sup>, 2009

Today was a SS day. As anticipated market was slow and tried to get back above the Buy day Low and came close but failed.

Monday is a Buy day, however it is hard to judge what will happen due to the half trading day.

Monday May 25<sup>th</sup>, 2009

Today was a Buy day. We did get a small decline.

Tomorrow will be a Sell day. We should technically continue the Rally that was started today. However as we know holidays have a tendency to mess up the works.

Monday June 1<sup>st</sup>, 2009

Today was a SS day and as I mentioned on Friday the momentum did take us higher.

Tomorrow is Buy day. So far a small decline has started and is in place on the 24 hour session. If the bulls are still in charge the decline could be shallow.

Tuesday June 2<sup>nd</sup>, 2009

Today was a Buy Day and as mentioned last night the bullish momentum only allowed for a small decline. Tomorrow is a Sell day. So far the rally from today's lows still has room to go if the bulls want to continue.

Wednesday June 3<sup>rd</sup>, 2009

Today was a Sell day. Looks like the Bulls took the day off today. Only ES didn't get a rally for the day session and only missed by 1 tick. TVGR was in effect.

Tomorrow is SS day. TF and NQ and YM are back above the Buy day Low and ES need to get back above before the close tomorrow.

Thursday June 4<sup>th</sup>, 2009

Today was a SS day. All 4 made a positive 3 day rally. ES being the weakest.

Tomorrow is a Buy day. Having closed on the highs the momentum may carry the markets higher before the decline starts. If we gap up at the open, that could present a nice shorting opportunity unless TVGR sets in.

Friday June 5<sup>th</sup>, 2009

Today was a nice Buy day. We Gapped above the SS day high and we knew we had very high odds of getting at least back to the SS day high. However we ended up with a shallow decline again.

Monday is a Sell day. After having made wave 5, will we get the expected rally or just a small one. Time will tell.

Monday June 8<sup>th</sup>, 2009

Today was a Sell day and as mentioned Friday only a small rally was achieved.

Tomorrow will be a SS day. So we don't seem to see much strength in the markets and we still need to correct that last big move up. A SS day would be a good day for that.

Wednesday June 10<sup>th</sup>, 2009

Today was a Buy Day. The gap up this morning was a good opportunity to short as we were above the SS day high and we knew we had high odds of getting atleast below these highs. We even went lower closed the gap and reached the TTT MA levels.

Tomorrow is Sell day. We closed in the middle of the rally so tomorrow could be a confusing day. For you new customers confusing day means up and down day with no real direction.

Tuesday June 16<sup>th</sup>, 2009

Today was a Sell day. Markets are showing signs of weakness with a small rally and a further decline below the Buy day low.

Tomorrow is SS day. Although we have very high odds of making it back to atleast the Buy day lows, this weakness could create a failed Positive 3 day Rally.

Wednesday June 17<sup>th</sup>, 2009

Today was a SS day. In last night's report I did mention that the weakness in the markets could create a failed 3 day rally. Both YM and ES tried hard and came within a few ticks of the goal but failed.

Tomorrow will be a Buy day. So far the decline from the SS day highs is small, so a further decline should be expected.

Thursday June 18<sup>th</sup>, 2009

Today was a Buy Day. ES and YM had a delayed reaction and finally reached the previous Buy day low. This ended up producing a shallow decline for this Buy day.

Tomorrow is Sell day. After the narrow range of today we could end up with a confusing day tomorrow

Friday June 19<sup>th</sup> , 2009

Today was a Sell day. The rally fizzled out just before reaching its objectives today. It ended up being an up and down day (confused day) and I am sure today being the expiry day for options and futures didn't help. Monday will be a SS day. We could get a bit of a rally before the decline starts, By testing today's highs.

Wednesday June 24<sup>th</sup> , 2009

Today was a Sell day. Markets continued the rally started yesterday and achieved at least the Penetration levels. But as feared, FOMC came in to mess things up.

Tomorrow will be a SS day. We are still above the Buy day low, so anything is possible. We do have a positive 3 day rally but it is weak so far.

Today was a SS day and since the 3 day rally was weak at the start they rallied to the projected numbers. Tomorrow will be a Buy day. Having closed near the highs, the momentum could take us higher before the decline begins.

Monday June 29<sup>th</sup>, 2009

Today was a Sell day. Markets tested the Buy day lows and rallied. So far the rally was not very strong  
 Tomorrow is a SS day. We often get a lot of re-shuffling of portfolios at quarter end thus explaining why the  
 rally of today was weak. Tomorrow may be an up and down day also.

Thursday July 2<sup>nd</sup>, 2009

Today was a Sell day. Day session failed to get a rally, and TVGR was in effect all day.

Tomorrow is a SS day. I would be surprised if we managed to get a positive 3 day rally due to the holiday

Friday July 3<sup>rd</sup>, 2009

Today was a SS day and as mentioned in last night's email, it would be very hard to get a positive 3 day Rally due to the short trading day.

Monday will be a Buy day. The long weekend may still affect the cycle, so this one is hard to call.

Tuesday July 7<sup>th</sup>, 2009

Today was a Sell day. So much for the rally to continue higher, we gapped down and TVGR was in effect all day.

Tomorrow is SS day. We are still within reach of the Buy day Low, and the odds of a Positive 3 Day Rally would point that these lows should be reached at some point before the close tomorrow.

Thursday July 9<sup>th</sup>, 2009

Today was a Buy day. Market's decline was shallow but the rally did not have much conviction in it. Tomorrow will be a Sell day. We should get a rally on a Sell day but we have started getting what I call Summer Friday's lately. Slow days.

Today was a Sell day. Markets were a bit confused and made for a small rally.

Monday will be SS day. Based on TTT averages we should get a rally, however if my wave count is correct it may be small.

Monday July 13<sup>th</sup>, 2009

Today was a SS day. Markets did pullback below the Buy day Low only to turn around and reach the projected MA 3 day rally.

Tomorrow is a Buy day. We should anticipate a Decline on Buy days. Having closed on the highs today, the momentum may carry the markets higher before the decline starts.

Thursday July 23<sup>rd</sup> , 2009

Today was a Sell day. We did get the expected rally. We also had TVGR set in and help propel this rally to higher than expected levels.

Tomorrow will be a SS day. It is a summer Friday so it may be just a slow drifting day.

Friday July 31<sup>st</sup>, 2009

Today was a Sell day that lived up to its nickname of a confusing day.

Monday will be a SS day. NQ should get back above the Buy day low before continuing the decline if that is what they want to do.

Monday August 3<sup>rd</sup>, 2009

Today was a SS day. Markets had closed at or near the Buy day low on Friday. The gap up and with TVGR in effect they rallied all day.

Tomorrow is a Buy day. Having closed on the highs we may have some residual upward momentum before the decline starts.

Wednesday August 5<sup>th</sup>, 2009

Today was a Sell day. This one could be called a confusing day as we opened and tested the high then the lows and back up again.

Tomorrow is a SS day. Technically we should rally some more based on averages but following a confusing day like today, it could go both ways.

Friday August 14<sup>th</sup>, 2009

Today was a SS day. ES tested the highs a few times overnight and failed to get much higher making this a perfect start for a SS day.

Monday will be a Buy day. The late day rally made a mess of the nice decline that was in place. At this point markets could go either way however averages would call for a decline first before the rally can start.

Monday August 17<sup>th</sup>, 2009

Today was a Buy day and as anticipated the decline resumed and reached the projected levels where support was found for most of the day. TVGR was also in effect all day.

Tomorrow will be a Sell day. Having closed on the lows today, the momentum could take the markets a bit lower before the rally starts. Should we gap down below today's lows at the open, we will have great odds of making it at least back to today's lows.

Tuesday August 18<sup>th</sup>, 2009

Today was a Sell day. The rally started in the overnight session and created a gap at the open today, TVGR set in after that.

Tomorrow will be a SS day. So far we have a small rally so it is possible for this rally to continue before the decline begins.

Wednesday August 19<sup>th</sup>, 2009

Today was a SS day. Markets pulled back near the Buy day low overnight, which gave a nice long trade from the open this morning.

Tomorrow will be a Buy day. Having close near the highs today, markets should retest these highs before the decline starts.

Tuesday August 25<sup>th</sup>, 2009

Today was a Buy Day. The overnight session did get a bigger decline compare to the shallow decline for the day session.

Tomorrow is a Sell day. Having closed near the lows of the day I would anticipate the rally to start fairly early in the day.

Thursday August 27<sup>th</sup>, 2009

Today was a SS day. Maybe the lack of a strong 3 day rally caused the up-down day.

Tomorrow is a Buy day. Normally we should expect a decline on Buy days.

Tuesday September 1<sup>st</sup> , 2009

Today was a SS day. As mentioned last night we did have good odds of getting back above the BdLow. We did and the SS day started the decline after that.

Tomorrow will be a Buy day. Most of the decline is in but momentum may take us lower before the Buy day Low is established

Friday September 4<sup>th</sup>, 2009

As mentioned in last night's comments, today was a SS day, and since the positive 3 day rally was weak, we had good possibility of going higher.

Monday will be a Buy day. Being a holiday we could end up with a shallow decline.

Tuesday September 8<sup>th</sup>, 2009

Today was a Sell day. Due to the holiday, we didn't get a decline on the day session yesterday and as such it ended up creating a confusing day for today.

Tomorrow will be a SS day. At this point we don't have much of a 3 day rally so higher high could be expected.

Today was a Buy day and as expected we tested the highs before making decline which was smaller than expected.

Tomorrow will be a Sell day and having closed in the middle of the rally we probably will get one of those confusing days.

Thursday September 17<sup>th</sup>, 2009

Today was a SS day and as mentioned last night, momentum did take the markets higher and reversed at the TTT levels.

Tomorrow is a Buy day. Based on averages, markets should continue their decline unless the bulls decide to give us only a small decline.

Thursday September 24<sup>th</sup> , 2009

Today was a Sell day. The rally was small and that is bearish.

Tomorrow will be a SS day. We do have good odds to get back above the Buy day low, however this bearish rally of today may mess things up.

Today was a SS day. As I mentioned last night we had good odds of making it to the BdL, however the rally of yesterday was bearish.

Monday will be a Buy day. With the bears in charge, the decline should continue.

Monday September 28<sup>th</sup>, 2009

Today was a Boy Day. The lows were achieved during the overnight session and markets gapped up at the open and TVGR stayed in effect all day.

Tomorrow will be a Sell day. Having closes near the highs of the day and most of the rally is already accomplished, I would expect a confusing day.

Wednesday September 30<sup>th</sup>, 2009

Today was a SS day. It started like a perfect SS day however due to quarter end portfolio dressing, it ended up more of a confusing day.

Tomorrow is a Buy day and as such we should expect a further decline.

Today was a Sell day. As expected momentum did take us lower before rally took the markets to at least the Buy day low.

Monday will be a SS day. Although markets don't look very healthy, we should at least get back above Buy day low.

Monday October 5<sup>th</sup>, 2009

Today was a SS day. We opened at or just above the Buy day Low, which filled the positive 3 day rally requirement. However markets did continue to rally in order to try to get to the average 3 day rally.

Tomorrow will be a Buy day. We should anticipate some kind of decline on a Buy day.

Tuesday October 6<sup>th</sup>, 2009

Today was a Buy day. Markets barely declined on the 24 Hour session and failed to decline for the day session. This would indicate that the bulls are back.

Tomorrow is a Sell day and the rally should continue.

Thursday October 8<sup>th</sup>, 2009

Today was a SS day. The rally continued and reached the TTT MA levels and even the TTT penetration levels

Tomorrow will be a Buy day. Normally we should expect a decline on Buy days. Will this momentum continue and give only a small decline? That is the question.

Monday October 19<sup>th</sup>, 2009

Today was a Buy day. The decline happened in the overnight session, and even the rally started early in that session also.

Tomorrow will be a Sell day. Having done part of the rally we could be in for a confusing day. There is also strong resistance at 1097 area on ES which is the next hurdle.

Wednesday October 21<sup>st</sup>, 2009

Today was a SS day and as expected last night we did try new highs before the decline started.

Tomorrow is a Buy day. We normally should expect a decline on buy days, however most of it is in place.

The momentum of the drop of the last hour could take us lower first.

Wednesday October 28<sup>th</sup>, 2009

Today was a Sell day. Market opened above the Buy day low making for a minimal rally. This does not look very good for the bulls.

Tomorrow is a SS day. At this point we are very far from the BdL. If the bulls want to save face they will have to work hard to climb up there.
