Monday November 09<sup>th</sup>, 2009

Today was a Buy day. Normally a decline should have occurred. The markets open with a large gap up and TVGR took over all day.

Tomorrow will be a Sell day. There is still room to go up on this rally. But having made a good part of the rally may cause for a confusing day.

Thursday November 19<sup>th</sup>, 2009

Today was a SS day. All 4 markets made a positive 3 day rally based on 24 hour charts however TF and ND failed on the day session.

Tomorrow is a Buy day. We normally should expect a decline on Buy days. Based on averages a good part of it is done, but we do still have room to go down.

Friday November 20<sup>th</sup>, 2009

Today was a Buy day and a boring one at that. Mainly the decline was done yesterday and the bears didn't want to make it that much more.

Monday will be a Sell day. We do have a small rally underway but not much conviction in it. Let's see what happens on Monday.

Today was a Sell day. We did peak at the TTT levels early in the day and then pull backed to make this a normal confusing Sell day.

Tomorrow will be a SS day. We do have a minimum 3 day rally in place so anything goes.

Tuesday November 24<sup>th</sup>, 2009

Today was a SS day which looked more like a Sell day being confusing.

Tomorrow is a Buy day and we should normally expect a decline. However the day before a holiday may make it active in the AM and boring in the PM

Thursday December 17<sup>th</sup>, 2009

Today was a Sell day. Not all markets made the required Day session rally, which negates the bullish move of yesterday.

Tomorrow will be a SS day. Having closed below the Buy day low It would be normal to expect a try to at least get to these levels.

Friday December 18<sup>th</sup>, 2009

Today was a SS day and YM and ES failed to make a positive 3 day rally. When I look back at this week I see that on the Buy day we had a shallow decline but we also failed to take out the SS day high, making it an inside day bar and making it an indecisive day bar which was confirmed yesterday.

Monday will be a Buy day. Let's see what kind of decline we get.

Monday December 21<sup>th</sup>, 2009

Today was a Buy day. ES which had failed to make a positive 3 day rally on Friday made up for it today by gapping up even above the previous Buy day Low, therefore correcting the failed 3 day rally..

Tomorrow will be a Sell day. Most of the rally could be in, so tomorrow could be a confusing day.

Monday January 4<sup>th</sup>, 2010

Today was a SS day. The rally continued and we closed near the highs.

Tomorrow will be a Buy Day and a Decline is needed on Buy days. A gap up above the SS day High in the morning would give us a good excuse to short.

Thursday January 7<sup>th</sup>, 2010

Today was a SS day and they did continue the rally.

Tomorrow will be a Buy day. We may get higher highs due to momentum but a decline should be expected.

However with the bulls in charge of late the decline may be shallow (small).

Friday January 8<sup>th</sup>, 2010

Today was a Buy day and we did get some small decline which confirms the bullish sentiment in the markets.

Monday will be a Sell day. Having closed on the highs today momentum should take us higher, however that could be done in a confusing way.

Friday January 15<sup>th</sup> 2010

Today was pretty much a text book SS day. Markets tested the Sell day high and failed to make higher highs and reversed hard.

Monday will be a Buy day. The decline is already in and being a shorten day I would not expect to much.

Monday January 18<sup>th</sup> 2010

Today was a Buy Day. As mentioned Friday the decline was in so we did start a small rally.

Tomorrow will be a Sell day. Based on averages the rally should continue, however it could also be a confusing day specially the day after a holiday.

Thursday January 21<sup>st</sup> 2010

Today was a Buy Day. Markets reacted as they should have by testing the SS day highs, failing to make get higher as is expected, at least in the early part of the day, they dropped hard. 1<sup>st</sup> stop was the RECAP MA TTT level which held for a bit then we went to the RECAP TTT level which is the full extent that should be expected.

Tomorrow will be a Sell Day. Having broken below some key levels, and having a bearish momentum, we could go lower before a rally can start.

Friday January 22<sup>nd</sup> 2010

Today was a Sell day. Markets did fulfill the TTT requirement but as expected due to the breakdown of key levels we did get continue the decline.

Monday will be a SS day. Although markets tried a last minute rally, it will take more than that to get a positive 3 day rally. As mentioned above the breakdown of the key levels and together with a failure to get above the BDL would look real bad for the bulls.

Tuesday January 26<sup>th</sup> 2010

Today was a Buy day. We did get a decline as a Buy day should.

Tomorrow will be a Sell day. We should normally expect a rally on a Sell day, however the momentum may take us lower before the rally starts

Thursday January 28<sup>th</sup> 2010

Today was a SS day. It was really a textbook SS day, we tested previous day high and failed to go higher so we had only one direction, down, and test the PL.

Tomorrow will be a Buy day. Technically the decline is in so we could go either way, but I would expect a test of today's lows before rally can start.

Friday February 5<sup>th</sup> 2010

Today was a SS day. We don't get to many 2 failed 3 Day Cycles in a row and that is not a good sign for the Bulls

Monday will be a Buy day. The problem is we nearly recuperated most of today's drop in the last stretch, and we still need a decline. This picture looks weird at the moment, so be careful.

Monday February 8<sup>th</sup> 2010

Today was a Buy and as mentioned on Friday, we needed a Decline but the picture did look confusing. We did get a below average Decline.

Tomorrow will be a Sell day. Having closed near the Buy day low, we may retest that level before the rally starts.

Thursday February 11<sup>th</sup> 2010

Today was a Buy Day and the low was made 1<sup>st</sup> and early, after which we rallied all day.

Tomorrow will be a Sell day. Having closed on the highs we should expect the momentum to continue, however since a good part of the rally is already done we may get a confusing day, specially before a long weekend.

Monday February 15<sup>th</sup> 2010

Today was a very quiet SS Day.

Tomorrow will be a Buy Day and we should expect a decline on Buy days. There is a statistic that claims that the last 20 something weeks Mondays or Tuesday's if Monday was a holiday, were mostly up days.

Based on that the decline may be small.

Tuesday February 16<sup>th</sup> 2010

Today was a Buy Day. TF and NQ managed to get a Decline however ES and YM failed to get a Decline. That is very bullish and having TVGR did help keep the price going up all day.

Tomorrow will be a Sell day. The rally should continue based on TTT and momentum, however as we know Sell days can be confusing.

Friday February 19<sup>th</sup> 2010

Today was a Buy day. We are experiencing a big battle between the Bulls and the Bears lately, and that is evidenced by shallow declines on Buy days and failed 2 day rallies. Who is going to win is the big questions but this could be a sign that a reversal is close by.

Monday will be a Sell day. We could experience a confusing day.

Thursday February 25<sup>th</sup> 2010

Today was a Sell day and having opened below the Buy day Low was the perfect opportunity to look for a long. TF was the best trade as it hit the TTT MAv D just at the open and that was in the DSP zone.

Tomorrow will be a SS day. So far the 24 hours does have a positive 3 day rally and as long as we open above the BdL then we could continue the rally

Friday February 26<sup>th</sup> 2010

Today was a SS day. Since most of the rally was accomplished yesterday markets had a hard time building on that rally.

Monday will be a Buy day and having closed on the highs today, we may test these highs before the decline starts.

Today was a Buy day and the Bulls were in charge as evidenced by the failure to get a decline in some of the day markets.

Tomorrow will be a Sell day and probably will be a very confusing day.

Wednesday March 3<sup>rd</sup>, 2010

Today was a SS day. We did get good 3 day rally before the decline started.

Tomorrow will be a Buy day and as such we should get a decline. The last minute bounce of today may be a sign that we may get a smaller decline, or we may make new highs before the decline starts.

Thursday March 4<sup>th</sup>, 2010

Today was a Buy day. The decline was small and basically stopped at the SS day Lows.

Tomorrow will be a Sell day. Based on the rally that started today, we have plenty of room to go up.

However the rally didn't look convincing, maybe due to the Employment news due tomorrow.

Monday March 8<sup>th</sup> ,2010

Today was a SS day. Both TF and NQ nailed the projected top.

Tomorrow will be a Buy day. Based on today's range it is hard to predict tomorrow. We are close to the tops so we could test them first before the decline starts, or the small decline that has started could continue. The overnight markets may give us a clue in the morning.

Tomorrow will be a Sell day. Having closed in the middle of today's range, tomorrow could be a confusing day.

Friday March 12<sup>th</sup>, 2010

Today was a Buy day. Great trade was available at the open since we open above the SS day high, and we were also in a nice 15min DP zone.

Monday will be a Sell day. We did get a shallow decline which is bullish, and we closed in the middle of today's range. That may make things confusing

Monday March 15<sup>th</sup>, 2010

Today was a Sell day. As expected it was a confusing day.

Tomorrow will be a SS day. Considering today's action and the fact that we have FOMC tomorrow, and based on the Wave levels that were achieved on Friday, we may get another confusing day tomorrow. Now based strictly on TTT, as long as we open above the BDL, anything is possible.

Tuesday March 16<sup>th</sup>, 2010

Today was a SS day. The bull were still in charge and continued the rally till the close.

Tomorrow will be a Buy Day and as such we should expect a Decline. Having said that, and having closed on the highs, momentum may take us higher before the Decline starts.

Wednesday March 17<sup>th</sup>, 2010

Today was a Buy day. All 4 made a decline during the globex session and only NQ made one in the day session, showing once again that the bulls are in charge.

Tomorrow will be a Sell day. I have reservations about tomorrow, since we started a decline late in the day today and didn't reach the SS day highs. Momentum of this decline may continue tomorrow and reach the last SS day highs to complete the decline that is missing. If this don't occur then the bulls will continue their climb.

Thursday March 18<sup>th</sup>, 2010

Today was a Sell day. As expected it was a confusing day based on yesterday's action.

Tomorrow will be a SS day. It is also Quadruple Witching Friday. Normally, that is a confusing day on its own. Now was today's action done based on that or will it continue tomorrow.

Friday March 19<sup>th</sup>, 2010

Today was a SS Day. It was also Quadruple Witching Friday. That made a nice combination to drop the market. Yes we didn't get the average 3 day rally but we did get a positive one. If you go back to your charts and look at the gap on the Buy day, as soon as it got filled the markets dropped hard ( TF ) ES couldn't get above the BD high and went for a dive.

Monday will be a Buy day. So far the decline could be considered as in, however I would expect a test of the lows before the rally can start.

Monday March 22<sup>th</sup>, 2010

Today was a Buy day. TF was the example of a textbook Buy Day. We opened at the maximum TTT levels and reversed hard all day.

Tomorrow will be a Sell day. Most of the markets have reached their Sell day objective so this may become a confusing day.

Tuesday March 23<sup>th</sup>, 2010

Today was a Sell day and started as confusing and finally broke out and reached some of the penetration levels.

Tomorrow will be a SS day. Having close on the highs today, I would expect a test of these highs before the decline can start.

Wednesday March 24<sup>th</sup>, 2010

Today was a SS day. Markets never even tried to make a new high and just decline but very slowly all day. This was a good SS day

Tomorrow will be a Buy day, so far the decline should take us lower.

Thursday March 25<sup>th</sup>, 2010

Today was a wild Buy day. Looked at the start that we were going to get a shallow decline if any but market reversed and dropped to make a decline and creating a very bearish close after having made new highs today.

Tomorrow will be a Sell day. We should normally get a rally on Sell days. However the closing down momentum may continue before a rally can start.

Today was a Sell day. We did get some kind on confusing day.

Monday will be a SS day. We are just above the Buy Day low. I would be careful as to how the market opens.

Monday March 29<sup>th</sup>, 2010

Today was a SS day and a quiet one at that.

Tomorrow will be a Buy day. Based on today's action it is hard to predict if we are going to test the highs before a decline starts or if we will get a shallow decline.

Tuesday March 30<sup>th</sup>, 2010

Today was a Buy day, and we did get a test of the Monday's high before the decline started and produced only a shallow decline.

Tomorrow will be a Sell day. We now have had 3 small range days in a row. At this point TTT calls for a rally, and should we break out of the 3 day range, it could be a big one. However we are sitting in the middle of today's range so it could go both ways.

Today was a Sell day. Ended up with another small range day, and it did go both ways.

Tomorrow will be a SS day. We do have room to go up, however today has shown that the bulls are weak.
