Futures and forex trading contains substantial risk and is not for every investor. An investor could potentially lose all or more than the initial investment. Risk capital is money that can be lost without jeopardizing ones' financial security or life style. Only risk capital should be used for trading and only those with sufficient risk capital should consider trading. Past performance is not necessarily indicative of future results. Hypothetical performance results have many inherent limitations, some of which are described below. No representation is being made that any account will or is likely to achieve profits or losses similar to those shown; in fact, there are frequently sharp differences between hypothetical performance results and the actual results subsequently achieved by any particular trading program. One of the limitations of hypothetical performance results is that they are generally prepared with the benefit of hindsight. In addition, hypothetical trading does not involve financial risk, and no hypothetical trading record can completely account for the impact of financial risk of actual trading. for example, the ability to with stand losses or to adhere to a particular trading program in spite of trading losses are material points which can also adversely affect actual trading results. There are numerous other factors related to the markets in general or to the implementation of any specific trading program which cannot be fully accounted for in the preparation of hypothetical performance results and all which can adversely affect trading results.

Today was a Buy day. As expected Momentum did take markets higher before the decline started.

Tomorrow will be a Sell day. There is room for the rally to continue, however it may be in a confused way.

# Thursday January 7<sup>th</sup> 2021

Today was a Buy day. ES tried to decline and produced the minimum decline at TTT level. Then the large gap up for the day session triggered TVGR which lasted all day.

Tomorrow will be a Sell day. Most of the 3 day rally is in place, therefore we could be in for a confused day.

#### Friday January 8th 2021

Today was a Sell day. Markets were confused and when YM reached its BDL, markets turned and rallied hard.

Monday will be a SS day. Momentum may take markets higher before the decline starts.

Have a great weekend.

# Monday January 11<sup>th</sup> 2021

Today was a SS day. ES gaped down at the open of the Overnight session and TVGR did set in. Then the day session also opened with a gap down and tried to rally, but failed.

Tomorrow will be a Buy day. Markets could retest today's low before the rally starts.

# Friday January 15<sup>th</sup> 2021

Today was a Buy day. Markets declined and reached some TTT level before rallying. However, once they reached possible 3 day rally levels a new decline started.

Monday will be a Sell day. Momentum may take markets lower before the rally starts. Have a great weekend.

### Tuesday January 19th 2021

Today was a SS day. On the 24 hour session, markets rallied from the start, producing a good gap up for the day session. They tried to close the gap but failed and a new rally started.

Tomorrow will be a Buy day. Momentum may take markets higher before the decline starts.

### Wednesday January 20<sup>th</sup> 2021

Today was a Buy day. Markets did manage to produce some kind of decline during the Globex session. Only RTY and YM did for the day session.

Tomorrow will be a Sell day. Momentum may take markets higher, but I would expect some confusion in the rally.

### Thursday January 21st 2021

Today was a Sell day. As expected, momentum did markets higher but then the confusion did set in.

Tomorrow will be a SS day. There is room for the rally to continue, however since we are above yesterday's low, the late day decline could continue.

# Monday January 25<sup>th</sup> 2021

Today was a Buy day. ES retested Friday's high a few times and failed then the decline started. Once it reached its Violation level the rally started.

Tomorrow will be a Sell day. Markets have nearly reached their target, therefore we could be in for a confusing day.

# Wednesday January 27<sup>th</sup> 2021

Today was a SS day. Markets decline and once NQ reached its BDL a rally started that managed to get RTY above its BDL. Then a new decline started due to TVGR.

Tomorrow will be a Buy day. Markets are way below their target. However momentum may take markets lower before the rally starts.

# Thursday January 28<sup>th</sup> 2021

Today was a Buy day. Once ES retested yesterday's low, the rally started. Day session saw a gap up and TVGR took over for most of the day.

Tomorrow will be a Sell day. ES closed at tomorrow's target, therefore we could be looking at some confusion.

### Friday January 29<sup>th</sup> 2021

Today was a Sell day. As expected markets were confused and tested their target a few time before the final decline.

Monday will be a SS day. Markets need to get back above their BDL. Once accomplished, anything goes.

Have a great weekend.

### Tuesday February 2<sup>nd</sup> 2021

Today was a Buy Day. The markets rallied all day and missed to produce a decline except for RTY. Day session saw a gap up and TVGR took over for most of the day.

Tomorrow will be a Sell Day. Since ES almost reached tomorrow's target, we could expect some confusion.

### Friday February 5<sup>th</sup> 2021

Today was a Buy day. Markets did manage to produce some kind of decline with the exception of ES day session which got to the 0 point but missed the decline by 1 tick.

Monday will be a Sell day. Half the rally is in place which could cause some confusion.

Have a great weekend.

# Wednesday February 10<sup>th</sup> 2021

Today was a Buy day. As expected momentum did take markets higher and once they reached some Penetration level, the decline started. Then once ES reached Violation level the rally started.

Tomorrow will be a Sell day. Part of the rally is in. We may be looking at some confusion.

### Monday February 15<sup>th</sup> 2021

Today was a Buy day. The holiday messed up the cycle with YM missing to decline for the Globex session and all of them missing for the day session.

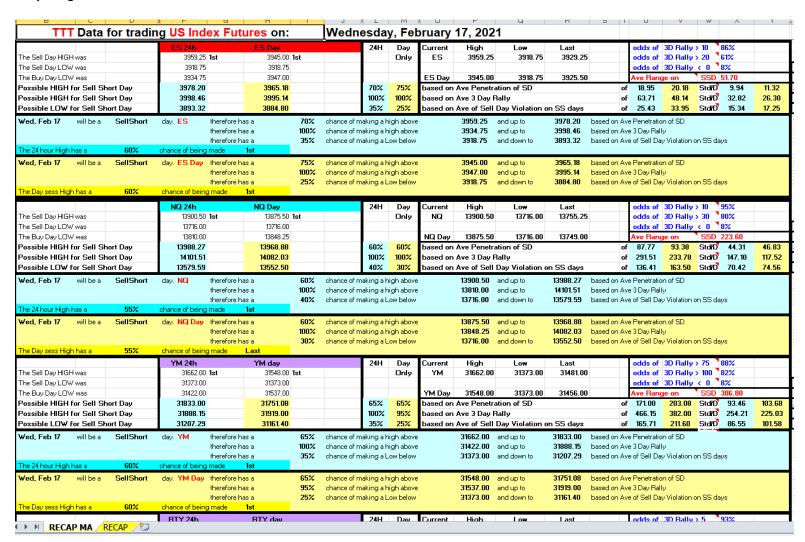

Tomorrow will be a Sell day. Often when failures happen on a holiday they correct the failure the next day. Therefore we could get the decline a day late and the rally could restart.

#### Tuesday February 16th 2021

Today was a Sell day. All but ES day session managed to have a rally before the decline that was missed yesterday started.

Tomorrow will be a SS day. Most closed below their BDL. Therefore we should be looking for some kind of rally to get us back above.

# Wednesday February 17<sup>th</sup> 2021

Today was a SS day. Most markets failed to produce a Positive 3 day rally.

Tomorrow will be a Buy day. Again it is hard to predict what will happen due to this week holiday. My best guess based on experience would be for a small decline, then for the rally to continue.

# Thursday February 18<sup>th</sup> 2021

Today was a Buy day. Markets declined and once ES reached TTT Range target which coincided with its Violation level, the rally started.

Tomorrow will be a Sell day. A good part of the rally is in place which could make for a confusing day.

### Friday February 19th 2021

Today was Sell day. Markets declined and once ES tested its TTT Dev Low, a new rally started and once it reached its TTT Dev High a new decline started. Therefore the confusion.

Monday will be a SS day. Momentum may take markets lower before a new rally starts.

Have a great weekend.

# Monday February 22<sup>nd</sup> 2021

Today was a SS day. All but NQ day session managed to produce a positive 3 Day Rally.

Tomorrow will be a Buy day. Momentum or confusion may take markets lower before the rally starts.

# Friday February 26<sup>th</sup> 2021

Today was a Buy day. And a confused one at that, trying to decide when to rally.

Monday will be a Sell day. Part of the rally is in place, therefore we could be looking for more confusion.

Have a great weekend.

#### Thursday March 4<sup>th</sup> 2021

Today was a Sell day. As expected markets did decline before the rally started. However it was a very confused rally.

Tomorrow will be a SS day. Markets have closed below their BDL. Therefore we should be looking for some kind of rally to take us above these levels. Once above anything goes.

#### Friday March 5<sup>th</sup> 2021

Today was a SS day. All but RTY made a positive 3 day rally. Amazing power of TTT.

Monday will be a Buy day. Having closed on the highs of the day, momentum may take markets higher before the decline starts. Specially to take RTY just a few points higher to recuperate the failed 3 day rally

#### Have a great weekend

#### Wednesday March 10<sup>th</sup> 2021

Today was a SS day. Depending of the instrument, today was a very confused day. YM rallied all day while others were all over the place.

Tomorrow will be a Buy day. We should be expecting some kind of decline. However YM may want to take markets higher before the decline starts.

#### **PS** Tonight's numbers are based on the June 2021 contract

#### Wednesday March 17<sup>th</sup> 2021

Today was a Sell day. As always Sell day can be confusing and specially on FOMC days. So as most markets were below their BDL. FOMC was the trigger to get them all above.

Tomorrow will be a SS day. There is room for the rally to continue. However if we open above the BDL for tomorrow's day session, then anything goes.

# Thursday March 18<sup>th</sup> 2021

Today was a SS day. Only NQ day session failed to produce a positive 3 day rally. The others had a confused day.

Tomorrow will be a Buy day. Looks like the decline is in place, therefore the rally could start at any time.

#### Wednesday March 24<sup>th</sup> 2021

Today was a Buy day. Markets were confused but finally produced a good decline reaching Violation levels.

Tomorrow will be a Sell day. We should be looking forward to some kind of rally. Having said that momentum may take markets lower before that rally starts.

#### Tuesday March 30<sup>th</sup> 2021

Today was a Sell day. As expected markets were confused and tried to retest the BDL before trying to rally again.

Tomorrow will be a SS day. There is room for the rally to continue, however if markets open above their BDL tomorrow, then it could go either way.

#### Thursday April1<sup>st</sup> 2021

Today was a Buy day. Markets did manage to produce a decline in the Globex session. However ES failed to produce a decline during the day session.

Tomorrow will be a Sell day. Since tomorrow is a Holiday I cant really predict anything but if I did it would be for a confused day.

#### Friday April 2<sup>nd</sup> 2021

Today was a Sell day. The rally continued but in a confused way.

Monday will be a SS day. Hard to predict what will happen since we had a holiday with news. Therefore markets could go either way.

Have a great weekend.

# Monday April 5<sup>th</sup> 2021

Today was a SS day. Markets continued their rally and reach some High Penetration levels.

Tomorrow will be a Buy day. Having closed on the highs of the day, momentum may take markets higher before the decline starts.

#### Wednesday April 7<sup>th</sup> 2021

Today was a Sell day. Talk about confusion. Every markets heading different direction. ES retested yesterday's low and rallied, YM and NQ went below and rallied back above. RTY is still below.

Tomorrow will be a SS day. Most markets closed on a last minute rally high. Since RTY is below yesterday's low, the others my try to get it back above that level.

Today was a Sell day. Markets had a confused rally.

Tomorrow will be a SS day. Part of the rally is in place. As long as every instruments open above yesterday lows, then anything can happen.

#### Thursday April 15<sup>th</sup> 2021

Today was a Sell day. Only RTY was confused while the others rallied all day.

Tomorrow will be a SS day. There is room for the 3 day rally to continue. However as long as markets open above their BDL for the day session, then all bets are off and markets can take any direction they want.

Today was a Buy day. As expected, markets declined and reached some TTT targets. Then a rally started.

Tomorrow will be a Sell day. There is plenty of room for this rally to continue.

#### Tuesday April 20<sup>th</sup> 2021

Today was a Sell day. Markets were really confused and declined below yesterday's low and reached some Violation levels.

Tomorrow will be a SS day. As we closed below the BDL, markets should try to rally to get at least back above that level, then all bets are off.

# Friday April 23<sup>rd</sup> 2021

Today was a Sell day. Markets were confused until YM reached yesterday's low. Then all started to rally.

Monday will be a SS day. ES did reach its 3 day rally target. Therefor if we open above yesterday's low for the day session, markets could go either way.

#### Wednesday April 28<sup>th</sup> 2021

Today was a Sell day. And what a confused day it was, with each instrument retesting yesterday's low at different time and may time.

Tomorrow will be a SS day. Only YM closed below yesterday's low. Therefore we should be looking for some kind of rally to get YM above.

#### Thursday April 29<sup>th</sup> 2021

Today was a SS day. But it was a confused SS day as when markets all rallied to their Deviation Penetration levels then they declined. That would have been the norm for the day. However when markets reached their Violation levels, a new rally started and ES retested it's day high and YM surpassing it.

Tomorrow will be a Buy day. Based on averages we should be looking at some sort of decline.

## Monday May 3<sup>rd</sup> 2021

Today was a Sell day. Markets tried to rally but NQ brought everyone down and closed below yesterday's low.

Tomorrow will be a SS day. Markets should rally in order to bring NQ back above yesterday's low. Once that is done then all bets are off and markets can go either way.

#### Tuesday May 4<sup>th</sup> 2021

Today was a SS day. Markets were confused as NQ failed to produce a Positive 3 day Rally, but the other 3 did. Even as YM reached its BDL a new rally started.

Tomorrow will be a Buy day. Will the late day rally continue or will markets try to produce the average decline? That is the question.

## Wednesday May 5<sup>th</sup> 2021

Today was a Buy day. We did get a decline but depending of the instrument, it was very confused.

Tomorrow will be a Sell day. I feel that the confusion will continue during the rally.

Today was a Sell day. Markets were confused. Some tested yesterday' low and failed then the rally started but even that rally was confused.

Tomorrow will be a SS day. Momentum should take markets higher as we still have room to go for the rally.

#### Tuesday May 11<sup>th</sup> 2021

Today was a Sell day. Momentum did take markets lower, but the rally was not strong enough for YM and ES day session to get back above yesterday's low.

Tomorrow will be a SS day. Based on averages, we should be looking for some sort of rally to bring back all of them above yesterday's low. Once accomplished, markets could go either direction.

#### Wednesday May 19<sup>th</sup> 2021

Today was a Sell day. Momentum did take markets lower and as they reached their Violation levels, the rally started.

Tomorrow will be a SS day. Some of the markets are below yesterday's low, therefore we should be looking for at least a rally to get them above. Once achieved, any direction could happen.

# Wednesday June 2<sup>nd</sup> 2021

Today was a SS day. Markets were very confused but all had a positive 3 day rally for both sessions.

Tomorrow will be a Buy day. We should be looking for some kind of decline before the rally starts.

#### Thursday June 10<sup>th</sup> 2021

Today was a SS day. Market did produce a Positive 3 day Rally but the decline was very confused depending of the instrument.

Tomorrow will be a Buy day. We should be looking for some kind of decline for the instruments that closed on their highs.

#### PS we are using the September contract as of tomorrow.

### Wednesday June 16<sup>th</sup> 2021

Today was a Buy day. Markets did go a little bit higher that the decline started. I was a confused decline probably due to the manipulation from the FOMC

Tomorrow will be a Sell day. The rally could start at any time but based on today's action, I would expect more confusion.

### Thursday June 17<sup>th</sup> 2021

Today was a Sell day. Markets were confused. We had NQ rallying like crazy, ES ZigZaging all day, RTY and YM mainly declining.

Tomorrow will be a SS day. We should be looking for a rally that would bring back RTY and YM from down below yesterday's low.

### Friday June 18<sup>th</sup> 2021

Today was a SS day. Markets tried to rally overnight but YM never made it over its BDL and RTY failed only for the day session. Both ES and NQ managed to get a positive 3 day rally for both session.

Monday will be a Buy day. Even if markets have reached their TTT levels, Momentum may takes market lower before the rally starts.

### Tuesday June 29<sup>th</sup> 2021

Today was a Buy day. Markets declined and reached some STD DEV levels. Then NQ rallied but the others were confused. It was a very confused day.
