Futures and forex trading contains substantial risk and is not for every investor. An investor could potentially lose all or more than the initial investment. Risk capital is money that can be lost without jeopardizing ones' financial security or life style. Only risk capital should be used for trading and only those with sufficient risk capital should consider trading. Past performance is not necessarily indicative of future results. Hypothetical performance results have many inherent limitations, some of which are described below. No representation is being made that any account will or is likely to achieve profits or losses similar to those shown; in fact, there are frequently sharp differences between hypothetical performance results and the actual results subsequently achieved by any particular trading program. One of the limitations of hypothetical performance results is that they are generally prepared with the benefit of hindsight. In addition, hypothetical trading does not involve financial risk, and no hypothetical trading record can completely account for the impact of financial risk of actual trading. for example, the ability to with stand losses or to adhere to a particular trading program in spite of trading losses are material points which can also adversely affect actual trading results. There are numerous other factors related to the markets in general or to the implementation of any specific trading program which cannot be fully accounted for in the preparation of hypothetical performance results and all which can adversely affect trading results.

Thursday July 1st 2021

Today was a SS day. Markets all went different directions today. ES has the most regular action and rallied most of the day, while the others were up and down all day.

Tomorrow will be a Buy day. We should be looking for a decline, however more confusion maybe in the cards.

Thursday July 8th 2021

Today was a Sell day. Markets were confused and started to go down from the start last night and reached their Violation levels. Then a new rally started and all managed to get back above yesterday's low during the day session.

Tomorrow will be a SS day. Having closed at or below their BDL, Markets should try to rally higher and as long as they are above their BDL for the day session, then they could go in any direction.

Friday July 16th 2021

Today was a Sell day. Markets continued their rally and reached their levels, however then the confusion started and they closed below yesterday's low.

Monday will be a SS day. Markets should get back above their BDL, then once they achieve that during the day session, markets could go in any direction.

Monday July 19th 2021

Today was a SS day. Markets gapped down at the open last night and TVGR took over. RTY tried to rally, but the others refused. Therefore they all failed for their 3 day Rally. Except for RTY on the globex session.

Tomorrow will be a Buy day. Levels are already surpassed. Momentum may take markets lower before the rally starts.

Tuesday July 20th 2021

Today was a Buy day. Markets rallied from the start and tried to negate yesterday's failure. NQ and RTY managed to negate and ES and YM tried hard and failed by few points.

Tomorrow will be a Sell day. I would expect a confused day specially after ES YM managed to finish negating the failure.

Wednesday July 21st 2021

Today was a Sell day. Now every instruments rallied back above the last cycle BDL, therefore negating the Failure to make a Positive 3 day Rally, which could be an indication of the markets turning bearish.

Tomorrow will be a SS day. Momentum may take markets higher before the decline starts.

Wednesday August 4th 2021

Today was a SS day. Only RTY was below its BDL at the open of the Day Session. Once it rallied above. As the odds would say, Markets did get confused and a decline started.

Tomorrow will be a Buy day. There is room for the decline to continue.

Thursday August 5th 2021

Today was a Buy day. Some instruments retested their PL while the others managed to do some minor decline. Then the rally started.

Tomorrow will be a Sell day. A good part of the rally is in, which could lead for some confusion.

Monday August 9th 2021

Today was a SS day. Markets were confused today with NQ dropping to Violation levels before being pulled by the others back above its BDL.

Tomorrow will be a Buy day. Markets have plenty of room to decline, before the rally starts.

Tuesday August 10th 2021

Today was a Buy day. Markets did retest yesterday's low and then the rally started. All this was in a very confused way.

Tomorrow will be a Sell day. I would expect for the rally to continue but probably in a confused way.

Wednesday August 11th 2021

Today was a Sell day. Confusion did set in from the starts with some trying to test their PH while the others testing their PL. This was a mess but at the end most rallied to the close.

Tomorrow will be a SS day. There is room for the rally to continue, however don't forget it is a SS day

Today was a SS day. As NQ retested it's BDL the others helped it get back above as they rallied most of the day.

Tomorrow will be a Buy day. Momentum may take markets higher before the decline starts.

Monday August 16th 2021

Today was a Sell day. Markets declined below their BDL and reached Violation Levels, then the rally started and all but RTY made it above their BDL.

Tomorrow will be a SS day. Markets still have room to rally, and they may drag RTY back above its BDL.

Tuesday August 17th 2021

Today was a SS day. Markets tried to get back above their BDL but only ES and NQ made it for the day session.

Tomorrow will be a Buy day. Markets may try to negate their failed 3 day rally then a new decline may start or the real rally may start

Thursday August 19th 2021

Today was a Sell day. As expected, Momentum did take markets lower before the rally started and at least took it back above yesterday's low.

Tomorrow will be a SS day. All except RTY missed to close above yesterday's low, therefore the other should probably rally to drag it above. Once all markets are above yesterday's low then anything goes as far as direction is concerned.

Tuesday September 7th 2021

Today was a SS day. Markets did decline but there was a lot of confusion on the way down for some of the instruments.

Tomorrow will be a Buy day. Most of the decline is in place, however momentum may take markets lower before the rally starts.

Tuesday September 14th 2021

Today was a Sell day. Markets were confused after they reached their TTT MA levels they declined and rallied and declined again until NQ finally reached its BDL. Then a new rally started.

Tomorrow will be a SS day. There is plenty of room for the rally to continue. However based on today's performance, more confusion could be in the books.

Wednesday September 15th 2021

Today was a SS day. Confusion was again here with markets declining below their BDL but then rallying to their TTT levels and some reaching yesterday's high.

Tomorrow will be a Buy day. Having closed on the highs, momentum may take markets higher before the decline starts.

Monday September 20th 2021

Today was a SS day. Markets declined from the start and never looked back and surpassed all levels. This produce a failed 3 Day Rally. This is a bearish sign unless negated by a large rally tomorrow.

Tomorrow will be a Buy day. Markets closed below their target for tomorrow, therefore the rally could start at any time. If the markets are really bearish then the decline could continue.

Monday September 27th 2021

Today was a Sell day. As expected confusion did set in. NQ is the only one that closed below its BDL.

Tomorrow will be a SS day. Since markets closed near their low for the day, the decline could start at any time. Having said that NQ needs to get back above its BDL during the day tomorrow.

Tuesday September 28th 2021

Today was a SS day. All markets managed to get a Positive 3 day rally for the Globex session, however most failed for the day session.

Tomorrow will be a Buy day. Markets may try to negate the failure by rallying early since the decline is already in place.

Thursday October 7th 2021

Today was a Buy day. Markets did manage to produce a decline for the Globex session but failed in the day session.

Tomorrow will be a Sell day. The late day decline may continue, to negate the day session failure before the real rally starts.

Friday October 15th 2021

Today was a Buy day. Markets tried to produce a decline but it was very small and some failed during the day session

Monday will be a Sell day. Markets will probably try to negate the failures and produce a decline before the real rally starts.

Friday November 19th 2021

Today was a Sell day. As expected momentum did take markets higher before the confusion started, with some markets closing at or below their BDL.

Monday will be a SS day. We should expect some kind of rally in order to make sure that all markets are above their BDL for the day session. Then anything goes.

Wednesday November 24th 2021

Today was a Sell day. Some of the markets retested their BDL, then the real rally started.

Tomorrow will be a SS day. Markets are at or close to their targets. Therefore the decline could start at any time.

Having said that it is a holiday, therefore for our American friends have a great Thanksgiving weekend.

Thursday November 25th 2021

Today was a SS Day. Markets continued their rally before the decline started.

Tomorrow will be a Buy day. The decline has room to continue, however being a half trading day, anything can happen. Having said that, I expect a nothing day.

Friday December 10th 2021

Today was a Sell day. Markets did try to retest their BDL and failed. Then the rally started.

Monday will be a SS day. There is room for the rally to continue, and momentum should help. Having said that, the decline could start at anytime.

Wednesday December 15th 2021

Today was a Sell day. Markets retested their BDL and then the real rally started.

Tomorrow will be a SS day. Markets have surpassed their target, therefore the decline could start at any time. Having said that, Momentum may take markets higher before the decline starts.
