Futures and forex trading contains substantial risk and is not for every investor. An investor could potentially lose all or more than the initial investment. Risk capital is money that can be lost without jeopardizing ones' financial security or life style. Only risk capital should be used for trading and only those with sufficient risk capital should consider trading. Past performance is not necessarily indicative of future results. Hypothetical performance results have many inherent limitations, some of which are described below. No representation is being made that any account will or is likely to achieve profits or losses similar to those shown; in fact, there are frequently sharp differences between hypothetical performance results and the actual results subsequently achieved by any particular trading program. One of the limitations of hypothetical performance results is that they are generally prepared with the benefit of hindsight. In addition, hypothetical trading does not involve financial risk, and no hypothetical trading record can completely account for the impact of financial risk of actual trading. for example, the ability to with stand losses or to adhere to a particular trading program in spite of trading losses are material points which can also adversely affect actual trading results. There are numerous other factors related to the markets in general or to the implementation of any specific trading program which cannot be fully accounted for in the preparation of hypothetical performance results and all which can adversely affect trading results.

Monday January 3rd 2022

Today was a Sell day. Markets retested their BDL and failed to go lower. Then the real rally started.

Tomorrow will be a SS day. Markets still have room to go higher before the decline starts.

Friday January 7th 2022

Today was a SS day. Markets tried to get back above their BDL but only YM failed by a little.

Monday will be a Buy day. We should be looking for a decline but it may rally first to get YM to negate the failure.

Today was a Buy day. A typical Buy day as markets declined to their Violation levels then rallied.

Tomorrow will be a Sell day. Markets have rallied past their rally levels. Therefore we could be in for a confused day.

Friday January 14th 2022

Today was a Sell day. Markets were confused trying to get YM back above the BDL. All closed above except YM.

Monday will be a SS day. Odds are that all instruments will get back above their BDL, then anything can happen.

Thursday January 20th 2022

Today was a SS day. As expected markets did rally back above their BDL and even reach their Penetration levels. Then the decline started.

Tomorrow will be a Buy day. The Decline is more than in place. However there is room to reach their Violation level before the rally starts.

Tuesday January 25th 2022

Today was a SS day. Markets declined from the start last night and opened below their BDL for the day session. At that point we knew we had good odds of at least getting back to that level before a new decline started. All made it except NQ which missed by just a few points.

Tomorrow will be a Buy day. The decline is in place, however momentum may take markets lower before the rally starts.

Wednesday January 26th 2022

Today was a Buy day. The rally started at the open of the Globex session last night, however we needed a decline for the day session. And we did get a late day decline which reached TTT MA before starting to rally again.

Tomorrow will be a Sell day. There is room for the rally to continue. But since a good part of the rally is in, we could get a confused rally.

Thursday January 27th 2022

Today was a Sell day. As expected we did get a confused day. In the overnight markets declined below their BDL and rallied again, only to retest their BDL again during the day session and rally again.

Tomorrow will be a SS day. There is room for the 3 day rally to continue, however if we open above the BDL for the day session, then anything can happen.

Today was a SS day. Markets retested their BDL the a new rally started. This was also done to bring RTY to its BDL in order to prevent a failed 3 day rally.

Monday will be a Buy day. Momentum may take markets higher before the decline starts.

Thursday February 10th 2022

Today was a SS day. Talk about manipulations. Markets first tested yesterday's high, then the news come and they test yesterday's low, then after what we could think they digested the news, they retest the highs again, only to reverse and make new lows at Violation levels.

Tomorrow will be a Buy day. Markets are at their levels for tomorrow. However based on today's action, confusion may continue.

Friday February 11th 2022

Today was a Buy day. As expected the day started confused and declined to $TTT\ v$ then rallied only to start a new declined that reached $TTT\ Mav$ before rallying again.

Monday will be a Sell day. There is room for the rally to continue, however the confusion and the momentum may take markets lower before the real rally starts.

Tuesday February 22nd 2022

Today was a Sell day. Momentum did take markets lower before a confused rally started. That rally retested yesterday's low again after the rally started.

Tomorrow will be a SS day. There is plenty of room for the rally to continue.

Thursday February 24th 2022

Today was a Buy day. As expected, momentum did take markets lower and retested their overnight lows a few times before the rally started.

Tomorrow will be a Sell day. Markets have rallied passed their targets, therefore we could be in for a confused day.

Tuesday March 8th 2022

Today was a SS day. Markets opened way below their BDL and tried hard most of the day to reach these levels. 2 out of 4 made it with the other 2 trying hard to get there, but then the real decline started.

Tomorrow will be a Buy day. The 2 markets that failed have reached their decline targets while the other 2 have room to go. Having said that momentum of the late day decline may take markets lower before the rally starts.

Wednesday April 6th 2022

Today was a SS day. Most markets managed to produce some kind of rally for the globex session but most failed for the day session.

Tomorrow will be a Buy day. Market may try to negate the 3 day rally failure by continuing the late day rally.

Tuesday April 19th 2022

Today was a Sell day. Markets tried to retest their BDL and failed. Then the real rally started.

Tomorrow will be a SS day. There is room for the rally to continue, However, as long as the day session opens above the BDL, the decline could start at any time.

Friday April 22nd 2022

Today was a Sell day. All but YM managed to produce some kind of rally even for the day session. Then a new decline started.

Monday will be a SS day. We will have a though hill to climb back for the markets to get back above their BDL.

Have a great weekend.

Monday May 2nd 2022

Today was a Sell day. Momentum did take markets lower and they reached their Violation levels and rallied twice.

Tomorrow will be a SS day. There is room for the late day rally to continue, however if we open tomorrow above the BDL, then the decline could start at any time.

Today was a SS day. YM retested its BDL a few times, creating more of a confused day for all the markets.

Tomorrow will be a Buy day. I would expect more confusion in the decline before the real rally starts.

Tuesday May 17th 2022

Today was a Buy day. Markets continued their rally overnight but decline during the day session. Once they reach yesterday's highs and a little more, the day's decline was done and a new rally started.

Tomorrow will be a Sell day. Most of the rally is in place which could make for a confused day.

Thursday May 19th 2022

Today was a SS day. Well, the mountain was to high to climb. So, we had a failed 3 day rally.

Tomorrow will be a Buy day. There is room for the decline to continue, however they may try to negate the failed 3 day rally by rallying to the previous BDL.

Friday May 20th 2022

Today was a Buy day. Markets did try to go higher at 1st but were limited by yesterday's high. Then the decline started and reached Violation levels before the real rally started.

Monday will be a Sell day. The rally is mostly in place which could make for a confused day.

Today was a Sell day. Markets did retest yesterday's low before the rally started.

Tomorrow will be a SS day. There is room for the rally to continue, however if markets open above their BDL the decline could start at any time.

Today was a Sell day. As expected, we did get a confused day. Markets rallied to their Penetration levels then the confusion started with a new decline.

Tomorrow will be a SS day. There is room for the rally to continue, however as long as we open above the BDL tomorrow morning, then decline could start at any time.

Today was a SS day. Markets continued yesterday's decline but still managed to produce a Positive 3 day rally even for the day session.

Tomorrow will be a Buy day. We are below target levels therefore the rally could start at any time. Having said that momentum may take markets lower before the rally starts.

Friday June 17th 2022

Today was a SS day. Markets tried to rally to their BDL but only 2 made it.

Monday will be a Buy day. Being a holiday anything goes, we should be looking for some kind of decline.

Tomorrow will be a SS day. Markets have room to continue the 3 day rally. However as long as they open above their BDL the decline could also start.

Thursday June 30th 2022

Sorry for the delay had internet issues on my 1st day of vacation

Today was a SS day. Markets did decline overnight but managed to get back above their BDL during the day session then a new decline started.

Tomorrow will be a Buy day. There is room for the decline to continue
