Futures and forex trading contains substantial risk and is not for every investor. An investor could potentially lose all or more than the initial investment. Risk capital is money that can be lost without jeopardizing ones' financial security or life style. Only risk capital should be used for trading and only those with sufficient risk capital should consider trading. Past performance is not necessarily indicative of future results. Hypothetical performance results have many inherent limitations, some of which are described below. No representation is being made that any account will or is likely to achieve profits or losses similar to those shown; in fact, there are frequently sharp differences between hypothetical performance results and the actual results subsequently achieved by any particular trading program. One of the limitations of hypothetical performance results is that they are generally prepared with the benefit of hindsight. In addition, hypothetical trading does not involve financial risk, and no hypothetical trading record can completely account for the impact of financial risk of actual trading. for example, the ability to with stand losses or to adhere to a particular trading program in spite of trading losses are material points which can also adversely affect actual trading results. There are numerous other factors related to the markets in general or to the implementation of any specific trading program which cannot be fully accounted for in the preparation of hypothetical performance results and all which can adversely affect trading results.

Tuesday January 3rd 2023

Today was a Sell day. Markets were confused and even managed to retest their BDL before rallying again.

Tomorrow will be a SS day. There is room for the rally to continue.

Monday January 9th 2023

Today was a SS day. Typical Taylor SS day with markets reaching their Penetration levels, then the decline started.

Tomorrow will be a Buy day. The decline is nearly in place; therefore, the rally could start at any time. Having said that momentum may take markets lower before the rally starts.

Tuesday January 10th 2023

Today was a Buy day. As expected, markets did decline a little further until they reached their Violation level. Then the rally started.

Tomorrow will be a Sell day. There is room for the rally to continue. Will we get some confusion is the question.

Wednesday January 11th 2023

Today was a Sell day. As expected, the rally continued with barely any confusion and markets reached their TTT MA targets.

Tomorrow will be a SS day. Markets are close to the target for tomorrow. Once achieved, the decline could start at any time.

Thursday January 19th 2023

Today was a Sell day. Momentum did take markets lower before a rally started.

Tomorrow will be a SS day. Having closed below the BDL, we should expect the late day rally to continue at least to the BDL. Once reached anything goes.

Today was a Buy day. Markets did manage to produce a small decline, then the rally started.

Tomorrow will be a Sell day. There is room for the rally to continue. However we may be in for some confusion.

Tuesday January 24th 2023

Today was a Sell day. Today's rally was very confused.

Tomorrow will be a SS day. There is room for the rally to continue, however, once markets are above their BDL for the day session then any direction is good.

Tuesday January 31st 2023

Today was a Buy day. And a typical one at that. Once markets reached their Violation level, then the rally started.

Tomorrow will be a Sell day. Since markets are at their target for tomorrow, we could be in for some confusion. Humm wonder what the FOMC will have to do with it??

Monday February 13th 2023

Today was a Buy day. Markets did produce some decline; however, they rallied strong in order to negate the last 3 day rally failure as expected.

Tomorrow will be a Sell day. The rally is in place. We could be in for a confused day.

Today was a Sell day. Markets tried to make it back to their BDL but only YM and RTY made it

Monday will be a SS day. Maybe the late day rally will help the last 2 make it to their BDL. However being a shorten day it may be difficult.

Thursday March 2nd 2023

Today was a Sell day. As expected, the confusion continued. Markets did get below their BDL and managed to get back above these levels.

Tomorrow will be a SS day. There is room for the late day rally to continue, however if we open the day session above the BDL, the decline could start at any time.

Tuesday March 7th 2023

Today was a Sell day. As expected, markets retested their BDL and managed to get a small Rally for the Sell day. Then a new decline started.

Tomorrow will be a SS day. Based on averages, markets should rally to their BDL. Then anything goes.

Wednesday March 8th 2023

Today was a SS day. Yesterday's decline was too much to recuperate, and markets basically stayed flat all day. Therefore, we had a failed 3 day rally.

Tomorrow will be a Buy day. There is room for the decline to continue. However, if markets rally from the start, they may try to negate the failed 3 day rally.

Today was a Buy day. Markets tried to negate last cycle's failure, however only NQ managed, and the others failed at their previous high. Then the decline started.

Tomorrow will be a Sell day. Momentum may take markets lower before the rally starts.

Monday March 20th 2023

Today was a Sell day. As expected, Markets did retest their BDL and even reached their Violation levels before the real rally started.

Tomorrow will be a SS day. There is room for the rally to continue, however if markets open the day session above the BDL, then anything goes.

Monday March 27th 2023

Today was a Buy Day. Markets did produce a decline for the Globex session but 2 failed for the day session.

Tomorrow will be a Sell day. There is room for the rally to continue, unless the 2 failures try to fix their problem.

Wednesday April 12th 2023

Today was a SS day. Markets reached their Penetration levels then the decline started. NQ and YM declines to the end of day while ES and RTY bounced back a bit.

Tomorrow will be a Buy day. There is room for the decline to continue, however the late day bounce of ES may confuse things.

Friday April 14th 2023

Today was a Sell day. As expected, confusion started as Markets reached their Penetration levels, then a decline started, then when RTY reached yesterday's low, a new rally started.

Monday will be a SS day. The best part of the rally is in place, therefore the decline could start at any time.

Today was a SS day. Markets didn't reach targets and started a decline, then rallied to try to reach the targets.

Tomorrow will be a Buy day. Momentum may take markets higher before the real decline starts.

Today was a Buy day. Markets reached Penetration levels, then the decline started. When some reached their Previous Low, then the rally started.

Tomorrow will be a Sell day. There is room for the Rally to continue. However since a good part of the rally is in place, we could be in for a confused day.

Thursday April 20th 2023

Today was a SS day. Markets declined below their BDL overnight. Since markets opened the day session below their BDL we knew that we had good odds of rallying back above and they did, only to be followed by a new decline and a late day rally.

Tomorrow will be a Buy day. There is room for the decline to continue, unless the late day rally was just an early start of the rally.

Monday April 24th 2023

Today was a Sell day. As expected, markets were confused as they retested their BDL before restarting another confused rally.

Tomorrow will be a SS day. Based on today's confusion, I would expect the for tomorrow. However, if markets open above their BDL for the day session, then the decline could start at any time.

Tuesday April 25th 2023

Today was a SS day. As expected, markets were confused at the start, but when all of them opened above their BDL, then the decline started.

Tomorrow will be a Buy day. The decline is in, even after the late day rally. Therefore there is good chance that this rally will continue.

Wednesday May 3rd 2023

Today was a SS Day. 2 out of 4 did produce a positive 3 day rally. Then the decline started.

Tomorrow will be a Buy day. The decline is in place; therefore the rally could start at any time. Having said that momentum may take markets lower first.

Today was a Sell day. Markets were confused as 2 went up and down and the other 2 just went down.

Tomorrow will be a SS day. The confusion could continue as some are close to targets.
